1. We are all well aware that the affairs of civil government are multifarious and that a political party must comprehend them all. But we are also well aware that political parties have won their victories upon one leading issue at a time accompanied by others of minor importance.

One great measure at a time has been the order not per of specific parties and that a political parties have baking not per of specific parties and that a political parties have a day.

of events in our history. Much may be truthfully said of the dependence upon education and training in all questions of moral reform.

But if there is anything in education and training, it must be manifested by practical activity. Hence this political movement which illustrates that education and training have taken practical form.

3. This movement is not to be bound by any one idea alone, nor mere form nor name. Neither can the end contemplated be reached in a day, nor by one struggle. With an intelligence and morality independent of the counsels of vice, law-lessness and greed, we can afford to exercise faith in the righteousness of a cause, the developments

of events to labor and to wait.

4. We congratulate the friends of prohibition in Indiana and the other States of the Union, North and fouth, that the greatest evil of this age is no longer to be evaded and appeased, but boldly confronted by a political party.

5. That, though the organization of a new political party in the midst of a heated National campaign, under the mercless fire of political rage,

was an undertaking of extreme difficulty, yet it

our numbers are being augmented by many men of influence and the highest character.
7. That in Maine, Kansas, Iowa and in the Southern States where prohibition obtains it has

conclusively proven lits superiority over all other legal remedies to control the evil influences of intoxicating liquor.

8. That the public attention is so thoroughly awakened to this question, the result of which promises to be determined action for the public protection of good morals.

9. That the issue between the liquor interest

and public welfare is daily being more clearly defined and developed.
